

See More. Do More. Protect More.

With Honeywell Connected Life Safety Services (CLSS)

Empower your facility with real-time insight, connected monitoring, and simplified compliance. Honeywell CLSS transforms how you manage, maintain, and monitor your life-safety systems.

CLSS: More Than a Communicator

Real-time visibility

into alarm panels, events, and device status — accessible anytime, anywhere

Streamlined compliance

with automatic digital inspection records and cloud-based documentation

Maintenance insights

that help predict issues before they become costly failures

Dual-path connectivity

(IP and LTE-M) for uninterrupted, UL-compliant signal transmission

Multi-site management

from a single dashboard — ideal for organizations with multiple facilities

How CLSS Supports Every Role

- **Facility Managers:** Monitor testing, maintenance, and alarm history from one portal
- **Service Providers/Integrators:** Access live system data to troubleshoot faster and reduce site visits
- **Safety & Compliance Teams:** Generate inspection reports instantly for AHJ review
- **First Responders:** Gain clearer visibility into alarm and event data for faster, safer response

Tech Electronics Makes It Simple

- Full installation, configuration, and onboarding by experienced technicians
- Training and support tailored to your team's needs
- Continuous monitoring and compliance management from a trusted partner
- Decades of life-safety expertise integrating Honeywell systems across industries
