

# Protect What Matter Most: Strengthen Your School's Security Systems

Creating a safe learning environment begins with understanding how secure your campus truly is. Tech Electronics partners with schools to evaluate and enhance existing security technologies- ensuring your systems are reliable, connected and ready when it matters most.

## Why Evaluate Your School's Security Systems?

Every campus faces unique challenges- from open access points and communication gaps to outdated surveillance and door control systems. A professional security audit from Tech helps you:

- Uncover vulnerabilities in your current security infrastructure
- Assess the reliability and readiness of safety technologies
- Improve emergency response and coordination across teams

## What Our Security Technology Audit Covers

- **Video Surveillance & Cameras:** Placement, Coverage and image quality
- **Access Control Systems:** Door hardware, card readers and lockdown capabilities
- **Intrusion Detection:** Alarms, sensors and integrated notifications

## Your Partner in School Safety

Our Education Account Managers work closely with your facilities and administrative teams to:

- Identify technology gaps
- Recommend practical, cost-effective improvements
- Build a roadmap for safer, more secure campus
- Maximize your existing technology investments

## Streamlined 7-Phase Security Audit

### Team Planning

Align with school leaders, IT, first responders and key staff to define goals

### Risk Management

Review infrastructure, threats and compliance with safety codes

### Layered Security Review

Evaluate perimeter, parking lots, entrances and classrooms for vulnerabilities

### Security Evaluation

Assess current protection levels and recommend phased upgrades

### Reporting & Budgeting

Deliver a clear report with prioritized recommendations and cost estimates

### System Implementation

Install and test solutions, then train staff for confident operation

### Ongoing Support

Provide annual reviews, pilot new technologies and offer 24/7 monitoring
