

YOUR TECHNOLOGY PARTNER FROM BID TO CLOSE OUT

Specialized Expertise. Reliable Execution. One Trusted Partner.

Tech Electronics partners with Electrical Contractors to provide the specialized technology expertise, estimating support, engineering, installation, and project coordination needed to successfully deliver complex building technology scopes.

From bid through commissioning and closeout, our team works alongside yours to keep projects coordinated, on schedule, and moving forward.

Why Electrical Contractors Partner with Tech

- ✓ **One Partner. Multiple Technology Scopes.**
Consolidate specialized low-voltage systems with one experienced technology partner.
- ✓ **Stronger Bids from the Start.**
Identify scope, system requirements, potential gaps, and cost considerations early.
- ✓ **Specialized Technical Expertise.**
Access dedicated experts in system design, codes, manufacturers, integration, and commissioning.
- ✓ **Fewer Surprises in the Field.**
Identify pathway, power, infrastructure, and interface requirements before installation.
- ✓ **Reliable Project Execution.**
Coordinate with your field teams, other trades, manufacturers, and project stakeholders.
- ✓ **Support Beyond Installation.**
Testing, commissioning, training, inspections, service, and ongoing system support.

Let's Bid the Next One Together.

Whether you're budgeting a project, preparing a bid, reviewing a technology scope, or looking for a reliable partner to execute specialized systems, bring Tech in early.

Our Technology Expertise

Fire Detection & Life Safety

Fire detection, early warning detection, clean agent suppression, mass notification, two-way emergency communications, and Area of Refuge systems.

Public Safety DAS / ERCES

In-building wireless systems providing reliable first responder radio, FirstNet, and cellular coverage with code-compliant, scalable infrastructure.

Integrated Security

Access control, video surveillance, intrusion detection, visitor management, emergency communication, and specialized security technologies.

Professional Sound

Sound reinforcement, voice lift, sound masking, assisted listening, broadcast, streaming, and recording systems.

Audio Visual

Conference room technology, video walls, digital signage, interactive displays, intercom, and integrated AV systems.

Healthcare Technologies

Nurse call, infant protection, patient wandering/egress, staff duress, and specialized healthcare communication technologies.
