

YOUR TECHNOLOGY PARTNER FROM PRECONSTRUCTION TO CLOSE OUT

Specialized Expertise. Seamless Coordination. One Trusted Partner.

Tech Electronics partners with General Contractors to simplify complex building technology scopes through specialized expertise, preconstruction support, system coordination, and reliable project execution.

From preconstruction through commissioning and closeout, our team works alongside yours to identify requirements early, coordinate across trades, and keep technology scopes moving with the overall project.

Why General Contractors Partner with Tech

- ✓ **One Partner. Multiple Technology Scopes.**
Consolidate specialized building technologies with one experienced partner, reducing coordination across systems and trades.
- ✓ **Better Coordination from the Start.**
Identify technology requirements, infrastructure needs, and responsibilities before they become field issues.
- ✓ **Specialized Technical Expertise.**
Access specialists who understand system design, codes, manufacturers, integration, and commissioning.
- ✓ **Fewer Surprises in the Field.**
Early scope review helps uncover gaps and conflicts that can impact schedule and cost.
- ✓ **Reliable Project Execution.**
Experienced teams coordinate with project stakeholders to keep work moving.
- ✓ **One Team Throughout Closeout**
From submittals and installation through commissioning, training, and closeout, Tech supports the technology scope through completion.

Let's Discuss Your Next Project.

Whether you're budgeting a project, reviewing technology scopes, or coordinating an active project, Tech can help identify requirements, address potential gaps, and provide the expertise needed for successful execution.

Our Technology Expertise

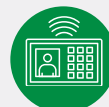

Fire Detection & Life Safety

Fire detection, early warning detection, clean agent suppression, mass notification, two-way emergency communications, and Area of Refuge systems.

Public Safety DAS / ERCES

In-building wireless systems providing reliable first responder radio, FirstNet, and cellular coverage with code-compliant, scalable infrastructure.

Integrated Security

Access control, video surveillance, intrusion detection, visitor management, emergency communication, and specialized security technologies.

Professional Sound

Sound reinforcement, voice lift, sound masking, assisted listening, broadcast, streaming, and recording systems.

Audio Visual

Conference room technology, video walls, digital signage, interactive displays, intercom, and integrated AV systems.

Healthcare Technologies

Nurse call, infant protection, patient wandering/egress, staff duress, and specialized healthcare communication technologies.
